Preface

The following conventions are used in this document:

Bold	Used for information that is typed, pressed, or selected in executables and instructions. For example, select connect to host .
<i>Italics</i>	Used for file names, directories, scripts, commands, user IDs, document names, and Bibliography references; and any unusual computerese the first time it is used in text.
<u>Underline</u>	Used for emphasis.
Arrows <>	Used to identify keys on the keyboard. For example <Return>.
“Quotation Marks”	Used to identify informal, computer-generated queries and reports, or coined names; and to clarify a term when it appears for the first time. For example “Data-Generation Report.”
Courier Font	Used to denote anything as it appears on the screen or command lines. For example <code>tar xvf dev/rmt/3mm</code> .
Capitalization	Used to identify keys, screen icons, screen buttons, field, and menu names.

1. Installation Procedures

1.1 Scope

These Installation Procedures (IP) provide a quick reference for installing the Netscape Directory Server (NSCAL) segment for the Defense Information Infrastructure (DII) on Windows NT-based machines.

1.1.1 Identification

Segment Name:	Netscape Calendar Server
Segment Type:	COTS
Prefix:	NSCAL
Home Directory:	<i>C:/h/COTS/NSCAL</i>
Required License:	Netscape Calendar Server License
Version Number:	1.0.0.0/1.01
Platform:	Intel PC/Windows NT 4.0

1.1.2 System Overview

- Purpose:** NSCAL is a calendar server application produced by Netscape Communications Corporation that provides corporate-wide open standards-Based calendaring and scheduling of people, groups, and resources.
- Usage:** NSCAL can be used to schedule events and tasks, to schedule conference rooms and conference calls, and meetings across an enterprise to include remote and mobile users.
- References:** “Netscape Calendar Server - Administrator’s Guide (NT)” from Netscape Communications Corporation (accompanies each licensed copy of the Netscape Calendar Server). On-line documentation accompanies the software, and additional documentation can be downloaded from Netscape at <http://www.netscape.com/>.

This page intentionally left blank.

2. Referenced Documents

“Netscape Calendar Server - Administrator’s Guide (NT)” from Netscape Communications Corporation (which accompanies each licensed copy of the Netscape Calendar Server).

This page intentionally left blank.

3. System Environment

3.1 System Requirements

3.1.1 Hardware Requirements

This software requires an Intel PC.

3.1.2 Operating System Requirements

This software requires the Windows NT 4.0 operating system and a functioning version of Netscape Communicator (web browser) must be installed on the system. Specifically, the Calendar Client component of the Netscape Communicator, must be installed for proper usage.

3.1.3 Kernel Requirements

DII COE Kernel Version 3.2 or higher.

3.2 System and Site Preparation

None.

3.2.1 System Configuration

None.

3.2.2 Operating System Preparation

None.

3.2.3 Tape/Disk Preparation

None.

4. Installation Instructions

4.1 Media Booting Procedures

Not applicable.

4.2 Installation Procedures

NOTE: Before installing the Netscape Calendar Server component, Netscape Communicator must be installed on this system.

Prior to installing the actual segment via the COE installer, the commercial off-the-shelf (COTS) Netscape Calendar Server software must be installed as follows:

Step 1: The calendar server may be installed via a CD-ROM disk or by downloading the appropriate binaries from the internet. This document will proceed as if the Calendar Server software will be downloaded from the internet.

Traverse to the Netscape Home page via your Netscape browser, the actual URL is www.netscape.com. Go to the bottom of the Netscape home page and click on the “**Get any Netscape product**” text in the middle column. When the Calendar Server Introduction page comes up, click on the download button. Then Click on the “Calendar Server” text under Messaging and Collaboration.

Select your operating system, “Windows NT 4.0”. Then select your product and version, **Calendar Server version 1.01**, for Windows NT, or the latest version for the Windows NT operating/system. Advance to the bottom of the page and click on the evaluation download, for a trial copy, or the actual download button to download a non-expiring version.

NOTE: The Calendar Server version 3.0 is the version corresponding to the Sun Solaris Unix operating system. Do not download version 3.0

Step 2: Once the calendar server binary, nc101eii.exe has been successfully downloaded, double-click on the binary to expand the distribution of the calendar server application files.

Step 3: After the nc101eii.exe has been expanded, click on the Setupex.exe file to begin the installation of the Calendar Server.

Step 4: After reading the Welcome screen click **NEXT**.

Step 5: Click **YES** to accept the license agreement.

Step 6: Answer **YES** or **NO** to the question about adding a new node to your existing configuration. If you click **YES**, accept the default identifier. Then provide an alias for the newly created node, for example: **CALENDAR**.

Step 7: Enter the password and confirm.

Step 8: Highlight your time zone and press **NEXT**.

Step 9: Choose whether or not you want mail notification.

Step 10: Choose whether or not you want SMTP mail server activated.

Step 11: View your current settings and Click **NEXT** to advance if they are correct.
Wait for the “initializing database” notification to subside.

Step 12: Click **YES** or **NO** to adding new users, then click **NEXT**.
(If you answered **YES**, wait for the “adding test users” notification to subside.)

Step 13: In the Setup complete screen choose whether or not you want to restart your computer.
Then click on **FINISH**.

Step 14: The setup program will now exit. To finish installing the Netscape Calendar Server, click on the Windows NT Start button, then click on **Programs**, **Netscape**, and **Netscape Calendar Server Administrator**. The Netscape Calendar Server Administrator window will appear. This is the program that you will use to configure the actual Netscape Calendar Server component. Customize the Menu items in the menu bar according to your specific site.

NOTE: The Calendar Client Component of the Netscape Communicator Professional 4.04 is an integral component of the calendaring service and must be installed for proper usage of the Calendar Server, though it is not a subject of this document.

Step 15: Once the Calendar Server has been successfully installed, run the COEInstaller to install the DII segment.

4.3 Installation of Upgrade

Not applicable. This is a new segment.

4.4 Installation Verification

Refer to the Software Test Description (STD) document for complete test of the software.

4.5 Initializing the Software

None required.

4.6 List of Changes and Enhancements

Not applicable. This is the initial delivery of this software.

4.7 Important Considerations

If the COTS software is not installed before the segment, the segment installation will deliver a message instructing the administrator to install the COTS and then will halt.

5. Notes

None.
